Heavy rainfall from Tropical Depression Gustav created minor flooding along the White River. Approximately 2000 acres of soybeans were flooded and destroyed in the Augusta vicinity on the White County side of the river.				
<b>WOODRUFF COUNTY --- 5.0 N PLEASANT GROVE [35.45, -91.27], 1.3 NNW AUGUSTA [35.30, -91.38], 2.9 NW GREGORY [35.18, -91.36], 5.5 NW GREGORY [35.20, -91.41], 6.8 W FITZHUGH [35.36, -91.44], 7.8 NW PLEASANT GROVE [35.47, -91.35]</b>				
	09/05/08 01:00 CST		0	Flood (due to Heavy Rain / Tropical System)
	09/11/08 18:00 CST		0.40M	Source: Newspaper
Heavy rainfall from Tropical Depression Gustav created minor flooding along the White River. Approximately 1000 acres of soybeans were flooded and destroyed in the Augusta vicinity on the Woodruff County side of the river.				
Tropical Depression Gustav entered the southwest corner of Arkansas on the evening of the 2nd and lingered in the southwest part of the state for nearly 24 hours. By mid-evening on the 3rd, Gustav was about 75 miles west of Little Rock. Gustav exited northwest Arkansas on the morning of the 4th. During its passage across Arkansas, Gustav produced excessive rainfall, strong winds, flash flooding and river flooding, and one tornado. In the Little Rock County Warning Area, wind gusts of 30 to 40 mph were common. The strongest gust measured was 48 mph at Little Rock National Airport/Adams Field. Power was knocked out to more than 100,000 electric customers. Wind damage was estimated at just over \$22 million. Storm total rainfall amounts exceeded 5 inches in many areas. The largest totals were 11.50 inches at Bismarck and 11.26 inches at Leola. Flood damage was estimated at just over \$13 million. The lowest barometric pressure was 29.49 inches at Mount Ida. There was only one small, weak tornado, which produced damage around \$25,000.				
<b>BRADLEY COUNTY --- 0.6 NW VICK [33.34, -92.13], 1.5 ESE INGALLS [33.37, -92.13]</b>

This tornado was spawned by Tropical Storm Ike. A few trees were blown down.

<b>LONOKE COUNTY --- 2.3 SW CABOT [34.95, -92.05], 2.3 WSW CABOT [34.95, -92.06]</b>				
	09/13/08 16:57 CST		0.30M	Tornado (EF1, L: 0.65 mi , W: 100 yd)
	09/13/08 16:59 CST		0	Source: NWS Storm Survey

This tornado was spawned by Tropical Storm Ike. The tornado peeled the metal structure off a self-storage warehouse building. Although the items stored in the warehouse were left pretty much in place, heavy rain poured onto them, badly damaging them. The roofs of several apartment buildings were damaged. In some cases, holes in the roof were large enough to allow rainwater to fall into the apartments. Metal buildings at an abandoned lumber yard had strips to metal torn off and thrown onto neighboring properties. A medical supply company's roof was damaged and bay doors were blown in. The facade of a strip mall was damaged, and business signs at the strip mall were blown out. Fences were blown down, as were power poles, power lines, and several large trees.

	09/14/08 09:00 CST	1	0	

Tropical Storm Ike moved into Arkansas on the evening of the 13th. By mid evening of the 13th, Ike was located in western Arkansas. Ike weakened to a tropical depression during the wee hours of the 14th, when it was located about 105 miles west-northwest of Little Rock. Ike exited northern Arkansas before sunrise on the 14th. In the Little Rock County Warning Area, wind gusts of 35 to 45 mph were common, and some gusts in the northern part of the state exceeded 50 mph. The strongest gusts measured were 67 mph at the Izard County Fairgrounds in Melbourne and 61 mph at the Newport airport. The strongest sustained wind measured was 46 mph at the Newport airport. Power was knocked out to more than 200,000 electric customers. Wind damage was estimated at just over \$30 million. There was one injury due to the winds. The greatest storm total rainfall was 4.60 inches at Big Fork. The lowest barometric pressure was 29.10 inches at Mountain Home. There were seven weak tornadoes, with damage estimated at just over \$450,000.
